NEW THINKING
for better solutions

After more than sixty years of producing quality electrical, hydraulic, and pneumatic components for use in military and industrial applications, we've established ourselves as industry leaders in efficiency, flexibility, and customer service. Our line of custom engineered switches offers proven reliability and unmatched customization.

Parts made by Nason are used around the globe in the harshest of environments, where engineers and users depend on the precision and reliability we promise to each of our clients. Our switches undergo rigid testing to ensure reliable service. We leave nothing to chance, crafting and assembling all parts within our own plant in the United States.

Our offering of options in ratings, connections, and mounting is unmatched in the industry. Besides our extensive stock of legacy switches, we keep an incredibly diverse supply of optional media and electrical connections to match our clients' varied design specifications. Whatever your challenge, our technical support is available to you before and after the sale.

Our 50,000-square-foot manufacturing facility, staffed with experienced design engineers and customer service representatives, exists solely to meet your engineering needs, big or small. We offer free switch samples to let you make sure that our customized design fits your particular application, so you can specify Nason with confidence. And we require no minimum orders, so even the smallest design challenge is no problem. Once you've looked over our products' 3D CAD models and have made your design decisions, our extensive component inventory will ensure rapid assembly, often shipping products within days.

Contact Nason to see how our custom engineered switches can fit your exact application.

NASON SWITCH DESIGNS ENSURE HIGH RELIABILITY

All of Nason's pressure switches use a snap-action electrical device activated by an elastomer diaphragm or piston, offering a precise and repeatable design. The snap-action design will maintain its state with contacts either open or closed, until a precise set point is reached when it will snap over center to a new state. It will remain in that state until a distinct change towards its original setting is sensed, at which time it will snap back to its original state. The design's snap-action feature prevents contact intermittency near its switch point, which is common in creeper designs. As system pressures fluctuate, our switches' inherent differential prevents searching. Nason uses only the highest quality snap-action switches. These switches and Nason's are UL, CSA, and military approved.

Accuracy

Our elastomer diaphragm or piston, which moves a precise .040 of an inch, ensures accurate, instantaneous contact under all operating conditions. While nitrile is preferred for general use, we can also provide ethylene propylene, fluorocarbon, fluorosilicone, and neoprene, depending on your need. Nason tests 100% of its switches for accuracy.

Reliability

Under most operating conditions, Nason switches have an operational life of over one million cycles. Smart design, quality components, and careful assembly make a switch that easily outlasts the competition.

Flexibility

We offer media connections in NPT, BSP, SAE, JIS, DIN, MS, and many more (refer to page 23) as well as all the electrical connections depicted on the facing page.

MORE ELECTRICAL CONNECTIONS THAN THE COMPETITION

Nason knows that your designs are used in all types of applications imaginable, so we want to make sure you have a choice of how you configure electrical connections. We offer you a wide and growing selection of connections, and if you want something else, just ask our design engineers for it.

PRESSURE SWITCHES

- Low to high pressure switch models with 2 psi to 7500 psi set points
- High-quality snap-action design
- Long-life elastomer diaphragms
- Proven sealed piston sensor on high-pressure models
- Over one million operating cycles
- 100% tested for accuracy
- Models for both pneumatic and hydraulic applications
- Adjustable and factory preset models
- Customizable
- NEMA 4 and 13 available

SNAP DISC THERMOSTAT DESIGN

BI-METAL THERMOSTAT DESIGN

BELLOWS THERMOSTAT DESIGN

TEMPERATURE SWITCHES

- Models TT, TD, TM, and HT
- TT — Bi-metal immersion temperature switch for low voltage/low current applications
- TD — Snap disc design for high reliability with shock and vibration
- TM and HT — Bellows design for high reliability with shock and vibration
- Available in a wide range of configurations
- NEMA 4 and 13 available
- 100% tested for accuracy

(See Electrical Options Below)

Shown with PD electrical option

TRANSDUCERS

- Three new models – NT100, NT40 and NT25
- Basic to highly customized models
- Hydraulic and pneumatic designs
- Models with accuracy ranges of 1%, .4% and .25%
- Vacuum ranges to 10,000 PSI
- IP69K seal available for the NT25, enabling high-pressure wash down capability
- Compact designs
- Custom outputs and ranges available
- Multiple industry applications

CE RoHS

Features

- Vacuum ranges to 10,000 PSI
- Various outputs
- Compact designs
- 316 stainless steel wetted parts
- Low cost
- Industrial 1% accuracy
- Custom outputs and ranges available
- OEM tested and approved

Application

- Hydraulic/mobile hydraulic
- Pneumatic systems
- Food and beverage industry
- Refrigeration systems
- Pumps and compressors
- Energy and water management
- Construction and agricultural equipment

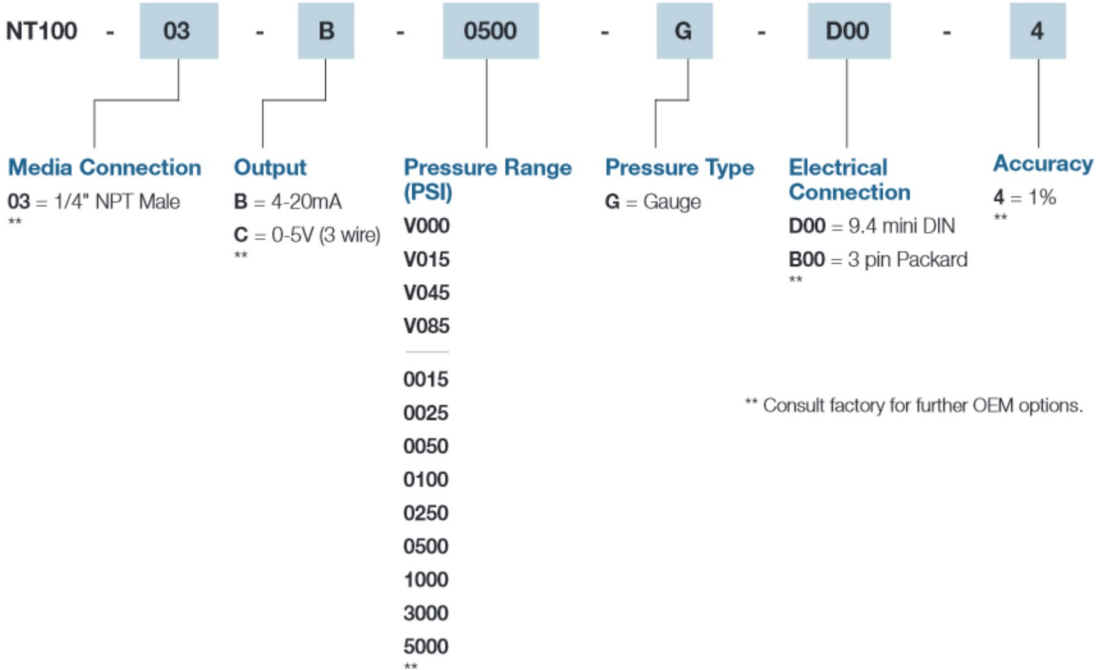

Description

The NT100 Series Pressure Transducer utilizes piezoresistance technology in an all stainless steel body. It is compact in size, has long term stability, is easy to install, and is very economical, as well as reliable.

The NT100 sets a new price-performance standard for low cost, high volume commercial and industrial applications.

- More standard pressure ranges, industry first
- Optional 4x over pressure is available up to 5,000 PSI
- 0.25% accuracy
- ASIC technology, no zero/span potentiometers
- All stainless steel welded housing
- IP-69K rated seal available (high pressure wash down)
- Innovative low current consumption, ideal for custom wireless solutions
- Programmable systems available for OEM/systems integrators for in-house configuring of outputs, ranges and set points to reduce inventory and lead times
- Calibration certificates available (contact customer service)

Description

The NT25 Series digital/configurable is an industry first. This industrial pressure transducer features stability and accuracy over a wide temperature range. It is lower in cost than competitive units typically not found in older analog designs. It is also plug and play, which is not found in most lower-grade competitive units.

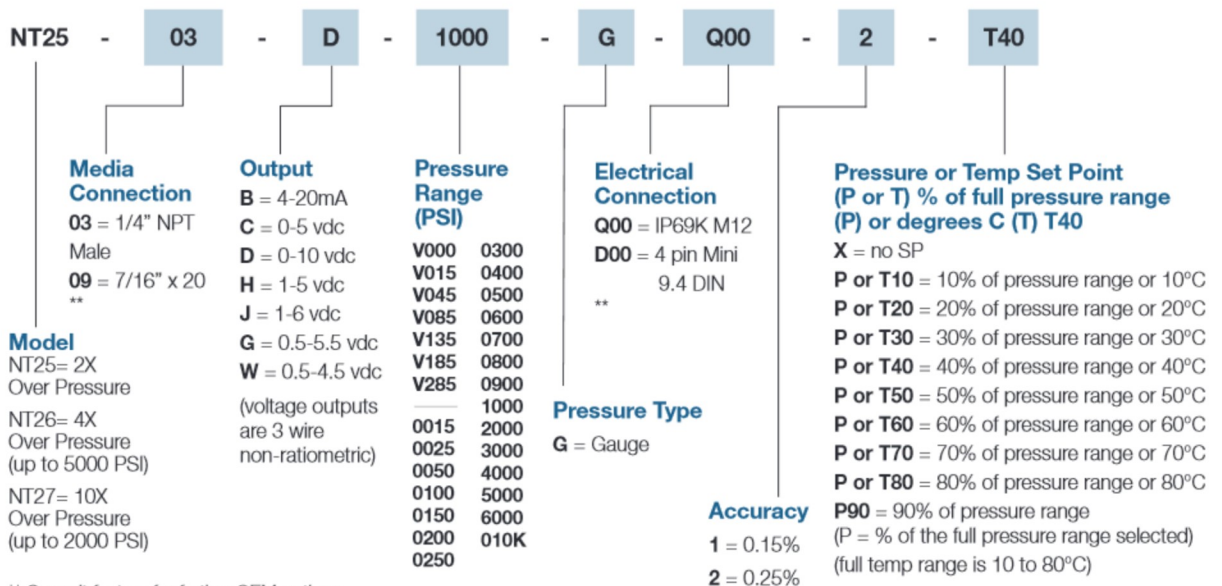

With its proprietary digital/ASIC technology, the NT25 Series features field-proven redundant sensing elements without the need for solder in resistors or trim pots that can drift over time. This provides years of excellent performance and reliability even in the harshest applications. This combined with optional

4x over pressure and the optional integrated temperature or pressure digital switch feature, makes the NT25 Series truly an industry first and second to none.

For extreme applications where power washers are used for wash down, the NT25 Series optional IP69K seal, another industry first, makes it ideal no matter what the environment.

With its flexible, low-power design and lower manufacturing costs, the NT25 Series offers outstanding value and makes it ideal for custom wireless applications.

Specifications

Performance

Accuracy	Performance @ 25°C (77°F)
Overrange Protection	0.25% BFSL (includes: non-linearity, hysteresis and non-repeatability)
Pressure Range	2x Rated Pressure or optional 4x and 10x
Burst Pressure	see ordering chart - up to 6000 PSI (690 bar) (optional higher ranges available)
Pressure Cycles	5x or 20,000 PSI, whichever is less
Update Time	>100 million
Digital Output	<=1msec
	Optional digital output for pressure or temp switch point
	(not available on 4-20mA output units)

Environmental Data

Temperature	
Compensated Temperatures	-40° to 100°C (-40 to 212°F)
Operating Temperatures	-40° to 100°C (-40 to 212°F)
Storage	-40° to 125°C (-40° to 250°F)
Total Error Band (TEB)	0.9%
Stability	0.25% FS typical (1 year)
Shock	100g, 6 ms, 1/2 sine per EN 60068-2-27, EN 60068-2-29
Vibration	12g peak, 10 to 2000 Hz per EN60068-2-6, EN60068-2-64
EMI/RFI Protection	Yes
Rating	Up to IP-69K available (high pressure wash down)

Mechanical Configuration

Pressure Connections	See ordering chart
Wetted Material	17-4PH stainless steel (for other materials consult factory)
Electrical Connection	9.4 Din, IP-69K 4 pin M12 Connector
Case (housing)	304 stainless steel

Electrical Data

Excitation	4.0-28 VDC, Typ (must be at least 0.3V above full output voltage) (7.5 VDC min for 4-20mA)
Output	see ordering chart
Output Load	0-800 Ohms @ 10-28 VDC for current output 10K Ohms minimum for voltage outputs
Current Consumption	25mA max (current output), <5mA (voltage output) without digital output, <8mA with digital output
Output Noise	<2mV RMS
Reverse Polarity Protection	Yes
Zero Offset	1%
CE Approval	Yes. Shield must be attached to connector housing (not tested with cable lengths over 30 meters).
Set Point for Either Pressure or Temperature	For pressure, this is done by selecting a percentage of your transducer's full range and this will be the set point (40% of a 1000 PSI range will have the set point at 400 PSI) "P40". For temperature, simply select in degrees C where you want the set point to be (selecting 40°C will be represented by "T40" in the part number).
Maintenance Mode	The maintenance mode output indicates 1/2 bridge failure.

Description

The NES Electronic Pressure Switch Digital Technology brings a new level of performance to the pressure switch world. The NES features a solid stainless steel long life header/diaphragm for demanding applications where o-rings and creeper compatibility are a thing of the past. The NES houses the proprietary redundant

bridge circuit for high-shock and high-vibration environments making it ideal for off road/mobile hydraulic applications where downtime is not an option. These industry firsts combined with the factory programmable set-point and hysteresis allows for low-cost custom solutions with next day shipments.

Pressure ranges and outputs listed above are quick ship versions.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use. While we provide application assistance personally, through our literature and the Nason website, it is up to the customer to determine the suitability of the product in the application.

Features

- **Compensated temperature:** -40° C to 85° C
- **Operating temperature:** -40° C to 100° C
- **Power supply:** 10.5 VDC to 28 VDC
- **Display:** 4-digit, bi-color display (red or green)
- **Outputs:** Digital : 250 mA max (PNP) or 200 mA max (NPN), or optional analog output: up to 10.5 VDC or up to 28 VDC (field selectable)
- **Media connection:** 1/4" NPT, 7/16-20 UNF, G 1/4
- **Pressure ranges:** Wide variety up to 10K psig

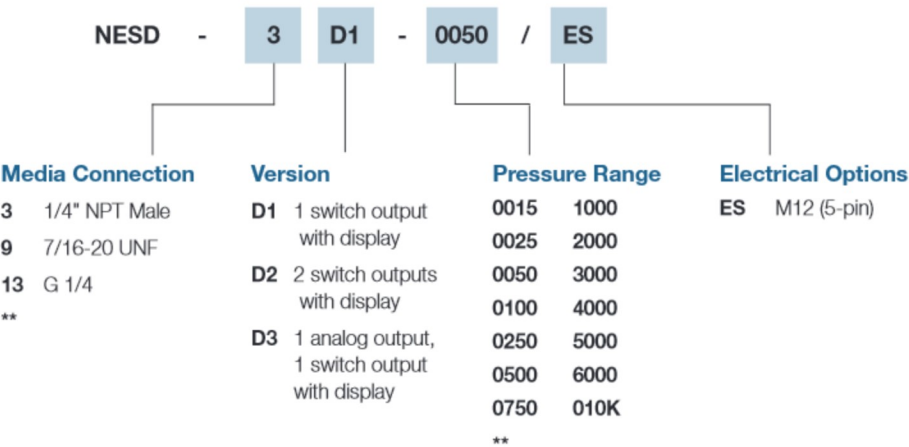

Description

What makes the NESD model stand apart is the unique LED display - which allows for 360° scrolling, or you can lock the display in one location. It also features field-programmable set points and hysteresis.

The NESD model incorporates redundant sensing technology, allowing for notification that

the sensor needs to be replaced before it might fail (maintenance mode), eliminating operational downtime.

The NESD model pressure switch/transducer comes standard with one digital output (NPN or PNP), optional analog output, operates from 10.5 to 28 VDC, and is IP67 certified.

** Consult factory for further OEM options. Pressure ranges and outputs listed above are quick ship versions.
Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use. While we provide application assistance personally, through our literature and the Nason website, it is up to the customer to determine the suitability of the product in the application.

Performance

Accuracy:	Performance @ 25° C (77° F) 0.5% of max operating pressure
Overrange Protection:	2x Rated Pressure or optional 4x and 10x
Pressure Range:	see ordering chart - up to 10,000 PSI (689 bar)
Burst Pressure:	5x or 20,000 PSI, whichever is less
Pressure Cycles:	>100 million
Update Time:	≤1msec

Environmental Data

Compensated Temperatures:	-40° to 85° C (-40° to 185° F)
Operating Temperatures:	-40° to 100° C (-40° to 212° F)
Storage:	-40° to 125° C (-40° to 257° F)
TEB:	1% BFSL (includes: Non-linearity, Hysteresis and Non-repeatability)
Long Term Drift:	0.2% FS/year (non-cumulative)
Shock:	50g, 11 ms, 1/2 sine
Vibration:	10g, peak, 20 to 2400 Hz
EMI/FRI Protection:	Yes
Rating:	Up to IP67

Mechanical Configuration

Pressure Connections:	1/4" NPT Male, 7/16-20 UNF, G1/4 Male
Wetted Material:	17-4PH stainless steel (for other materials consult factory)
Electrical Connection:	M12 (5-pin)
Case:	(housing) 304 stainless steel and high-impact polycarbonate (display)

Electrical Data

Power Supply:	10.5-28VDC
Output:	10.5 VDC to 28 VDC at 250 mA max (PNP) or 200 mA max (NPN) (digital) up to 10 VDC or up to 20 mA (analog)
Field Programmable:	
Output Impedance:	<100 Ohms, Nominal
Current Consumption:	30 mA at 24V/voltage output 40 mA at 12V/voltage output 50 mA at 24V/voltage output 60 mA at 12V/voltage output
Output Noise:	<2mV RMS
Reverse Polarity Protection:	Yes

For best performance use shielded cables.

Mating connectors and cable assemblies sold separately.

Glossary of Terms

Snap-Action Switches

Nason uses only the highest quality snap-action electrical switches which insures a positive, instantaneous electrical contact under all operating conditions. Nason electrical switches are UL, CSA, CE, and military listed. Ask about our new environmentally sealed snap-action switch.

Diaphragms

Nason pressure switches incorporate elastomer diaphragms to provide a positive media seal. Nitrile is the material of choice for most applications. Ethylene propylene, fluorocarbon, fluorosilicon, and neoprene are readily available for specific applications.

Differential

A distinct change in pressure (or temperature for temperature switches) is necessary to reset a Nason snap-action switch to its original electrical state. This feature prevents “searching” and maximizes switch and system life. Catalog ranges are typical mid-range and can be varied with special construction.

Electrical Connections

A wide variety of electrical connectors are readily available for most applications. Screw terminals, wire leads, blades, studs, conduit, automotive DIN and military connectors are stock items.

Media Connections

Nason’s offering of media connections is unmatched in the industry. NPT, BSP, SAE, JIS, DIN, MS and many others are readily available.

Electrical Circuits

A unique variety of electrical contact arrangements allows the system designer to achieve complex logic at minimal cost. Contact arrangements up to form ZZ and isolated dual set points are available.

Electrical Rating

Most Nason switches are available in a nominal 5 or 10 AMP rating. Gold plated contacts for low current and 25 AMP ratings are also available.

Life

The operational life of a Nason switch is normally in excess of one million cycles. Operating life depends on many variables, and specific tests should be run if marginal conditions exist.

Application

Nason switches are used successfully in a great variety of pneumatic and hydraulic applications. Military vehicles and equipment, aviation, marine, machine tools, farm and construction equipment, process equipment, medical equipment, and industrial machinery are typical applications.

Customization

Nason has the experience and willingness to customize any switch to meet specific application requirements. Special media connections, electrical connections, circuitry and construction materials can be designed and produced as needed.

WARRANTY:

It is the sole responsibility of the user to determine the suitability of any product or information supplied by Nason for any application or use by the user.

ALL ORDERS FOR PRODUCT ARE SUBJECT TO THE FOLLOWING: Nason warrants each product to be free from defects in material and workmanship under normal use and service. Nason's obligation under this warranty is limited to repairing or supplying, at our option, a part or parts to replace any defective part or parts which fail, within one (1) year from date of shipment. No product shall be returned without prior authorization. If authorized, the transportation charges shall be prepaid to Nason, Walhalla, South Carolina. Unauthorized returns will not be accepted.

The provisions of this warranty shall not apply to any part or parts which have been subject to misuse, negligence or accident, or which have been repaired or altered in any way so as in the judgment of Nason to affect adversely its performance, stability or reliability.

Nason neither assumes nor authorizes anyone to assume for it any other obligation or liability for any loss or damage, either direct, incidental or consequential, resulting from or arising out of or in connection with any of its defective part or parts.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ANY AND ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND OF ANY OTHER OBLIGATION OR LIABILITY ON THE PART OF NASON OF ANY NATURE WHATSOEVER.

Over the years of running a mobile RV repair service, having a dedicated place to access service manuals for all the different appliances and components found on RVs was something that I always had a desire to create.

I hope this resource makes your RV repairs easier, as it has mine, but please be careful and follow proper safety practices when attempting to repair your own RV.

If in doubt, please consult with a professional RV technician!
