What is the Atwood Leveleg System?

- **Class A Auto Position Electromechanical Jack System**
  - Electric Ball Screw Jacks
    - 66280 - 7.5K Lifting capacity jack w/ 15” of travel
    - 66302 - 7.5K Lifting capacity jack w/ 13” of travel
    - 66334 - 7.5K Lifting capacity jack w/ 15” of travel, 4” taller
    - 66070 - 10K Lifting capacity jack w/ 15” of travel
  - Auto Position Controls
    - 66272 - Auto position controls kit for Ford chassis
    - 66276 - Auto position controls kit for Workhorse chassis
  - Jack Mounting Bracket Kits
    - One of the following for each Jack
      - 61023 - Bolt on universal kit, 7.5K (same as 61025 but has bolts)
      - 61025 - Weld on universal kit, 7.5K (61011 jack bracket side slots)
      - 61030 - Weld on universal kit, 7.5K (61031 jack bracket front slots)
      - 66031 - Weld on P chassis rear kit, 7.5K
      - 66032 - Weld on P chassis front kit, 7.5K
      - 61039 - Bolt on '06 F53 chassis front kit, 7.5K
      - 66060 - Bolt/Weld on universal kit, 10K
Leveleg System Components

Components List

A – Front Leveleg (2)
B – Front Leveleg mounting bracket kit (2)
C – Rear Leveleg (2)
D – Rear Leveleg mounting bracket kit (2)
E – Auto Position control module
F – Keypad
G – 120 Amp circuit breaker
H – 4-Pin connector cable (wire harness)
J – 8-Pin connector cable (wire harness)
K – Front Leveleg harness
L – Rear Leveleg harness
M – Power wiring
Leveleg Components Continued

A,C – Leveleg
- 7.5K or 10K rating per Leveleg
- Two brackets Frame and Jack
- Square tube, ball screw system
- Typically matched fronts and matched rear levelegs based on axle rating

B,D – Mounting Bracket Kits
- Frame Bracket can be Welded or Bolted
- Four Bolts to Remove Leveler
- Built in Vertical Adjustment in Leveler Bracket
- Four Inches in 7.5K System
- Three Inches in 10K System

Jack bracket
61011
7.5K – Frame bracket - 61022
7,500 lbs. Leveleg and mounting brackets

10K – Frame Bracket - 66060
10,000 lbs. Leveleg and mounting bracket
Leveleg Components Continued

E - Control Module
- Either 66274 used on Ford Chassis or 66275 used on Workhorse Chassis (difference in transmissions signals)
- Contains Electrolytic Fluid for Auto Position
- Must Mount Up and Forward
- Connections are Molex Style

F - Key Pad
- User Interface with System
- Screw Mounts to Dash Board
- Shows Safety State of System
- Shows Jack Position
Leveleg Components Continued

G - 120 Amp Breaker – On (+) battery Lead (2 gage wire recommended)
H - Keypad Wiring – (4) pin connector at control board and keypad
J - Coach Wiring – (8) pin connector at control board and to coach for Ignition, Transmission signal, Parking brake, and Foot brake
K/L - Leveleg Wiring – 10 gage wire connecting to leveler motor with watertight connector and to control board with quick connector for both front or both rear levelegs
Recommended Tools and Equipment

**Equipment and tools**

- Welder and welding supplies (optional bracket mounting method)
- (2) 3/4 Inch wrenches
- 3/4 Inch socket and rachet
- Torque wrench (65 foot lbs. min.)
- 7/16 Inch nut driver
- Wire cutters
- Wire strippers and crimpers
- Phillips screwdriver
- Standard screwdriver
- 20 feet of red #2 wire
- 20 feet of black #2 wire
Installation

- **Mounting Brackets**
  - (4) ½”-13 x 1-1/2” Grade 8 bolts (at widest spread possible) or weld to frame (min. 6” of weld per side)
  - Brackets reversible for Leveleg height adjustment
  - 7.5K has reversible Leveleg bracket which holds Leveleg and bolts to mounting bracket with (4) ½”-13 bolts
  - 10K Bolts directly to mounting bracket with (4) ½”-13 x 1-1/2” Grade 8 bolts
  - Some frames do require specific mounting bracket kit

- **Levelegs™**
  - Motor mounted toward front or rear of coach also available for motor to face out from frame
  - Recommended 3” of clearance to outside of leg for service removal
  - Ground clearance requirement is 7”-10” on a loaded coach.
  - 7.5K Leveleg 2.5” square tube and 10K Leveleg 3” square tube
Installation Continued

- **Control Module**
  - Mount securely by (4) mounting holes in corners in a dry stable compartment. For best leveling results mount over frame between front and rear axles of coach.
  - Control must be mounted face up within 8 degrees of level and the arrow pointing toward the front of the coach.

- **Keypad**
  - Mount near driver using (4) mounting holes in corners. Snug tight only, use of air tools could damage keypad.
  - Single 4-pin connector from control board to keypad.
Power and Leveleg Wiring

- Connect watertight connector for each 2-wire Leveleg harness to each of the Leveleg motors. Route harness back to control module leaving some disconnect slack and avoiding sharp edges and moving parts.
- Cut, and strip wires at control board. Crimp to appropriate molex connector lead as marked on short wires. (DR, PR, DF, PF and match lead color)
- If installing system with air dump connect fill lead to extra connection point of rear harness and dump lead to extra connection point of front harness.
- Snap Molex™ connectors into control module as marked on control module.
- 2 gage power wires with ring terminal connections recommended for supplying power and ground. The Battery (+) side connects to the P1 post on the board using a nut. The 120 amp breaker is required in this (+) line approximately 18 inches from the battery. Ground wire connects to the P2 post. Both lines are recommended directly from the battery.
Installation Continued

- **Signal Wiring**
  - Coach wiring, 8-pin connector
  - Connect at control module and coach
  - Signal Wiring:

- **All signals are ground except “Workhorse” transmission is positive.**

</tbody>
</table>

- **Keypad wiring, 4-pin connector**
  - Connect at control module (right) and keypad (pg.10)
  - (1) Ground wire
  - (1) 12 volt wire
  - (2) Signal wires (0 – 12 volts)
Initial Setup

- Insure Three Green Lights on Key Pad
  - Engine Running
  - Park Brake Set
  - Park/Neutral Engaged
- No Low Voltage Light
- Control Module Shipped in Error State
  - All Leveler Lights Blinking
- Press ALL and RET to get out of Error Mode
Initial Setup Continued

- Press and Release EXT and ALL
  - All Levelegs will go down and Touch Ground
- Press and Release EXT Button
- Press and Hold Leveler Buttons
  - Levelers always work in Pairs
  - For every 6 seconds of extension opposite pair will retract for 2 seconds
- Press and Release RET Button to put into Retract Mode if Needed.

![ATWOOD® LEVELEG™ Diagram](image-url)
To Set Auto Position Memory - Once Coach is in Desired Position

- Press On to Turn Key Pad Off
- Press EXT Button 5 Times
- Press RET Button 5 Times
  - All Lights will Blink
- Press ALL 3 Times
  - All Lights will Turn Off
Initial Setup Continued

- **Diesel Auto Air Dump Setup**
  - Once Auto Position is set up for the First Time
    - Levelers’ Lights will Scroll Back and Forth
    - Press PASS Button 3 Times to Turn Off
    - Press DRIVER Button 3 Times to Turn On
    - This will only happen the first time the Auto Position is set.
  - To Return to Air Dump Setup mode:
    - Turn keypad off
    - Press EXT (10) times
    - Press RET (10) times
    - Leveleg lights will scroll back and forth
    - Press DRIVER (3) times to turn on or PASS (3) times to turn off
To Retract Levelegs
- Press and Release the ALL and RET Buttons Together
- All Levelegs will come up and turn off

Emergency Stop
- Press any Button While Levelegs are Moving
- All Levelegs will Stop Moving
- Must Retract Levelegs Once Emergency Stop is Pressed
Ready to Level:
- Turn Keypad ON and Press AUTO
- Levelegs will go down and touch ground
- Then they will Auto Position the Coach
- Once Positioned – System will insure all levelegs are on the ground
- Turn unit off, or the unit will go off on its own after 5 minutes

Ready to Leave:
- Turn Keypad on and Press RET and ALL
- Levelegs will come up to fully retracted position and lights will indicate fully retracted
- Turn unit off, or the unit will go off on its own after 5 minutes
1.) Turn Level Leg Key pad off.
2.) The engine is running depress foot brake.
3.) The park brake is released.
4.) The transmission in gear (Drive or Reverse).
5.) The following three buttons push simultaneously on the key pad, Front, Rear, and All.
6.) This will momentarily dump the air bags to allow the vehicle to be driven through a doorway that was too low for the vehicle to be driven through with the air bags filled.
Leveleg Trouble Shooting

No LED’s and no response from keypad

Check 120 amp fuse, Check 3 amp fuse
OKAY

Check battery voltage. (12.5 Volts minimum) LOW
OKAY

Check ignition wire voltage. (12 volts on pin 7 w/ RV on)
12V to board

Check 4 Pin connector voltage at keypad. (3 w/ 12 volts, 1 ground)
OKAY

Check for moisture on or near control board or keypad.
NO

Replace keypad, see Determining Service Kit

OKAY

Reset 120 amp breaker, Or change 3 amp fuse

Correct low battery issue. (System required voltage)

Check ignition voltage at RV connection (12 volts w/ RV on)
NO

Check 4 Pin connector voltage at control board (3 w/ 12 volts, 1 ground)
NO

Fix or Replace 8 Pin connection cable

YES

Fix or Replace 4 wire cable

NO

Fix or Replace 4 Pin connection cable

YES

Replace control board, see Determining Service Kit

NO

Allow control board/keypad to dry

YES
Leveleg Trouble Shooting

Some LED’s light with no operation of keypad

No “Park Brake Engaged” LED, but others lit

Red/Green LED’s bouncing side to side

Low Voltage LED lit

(4) Vertical LED’s blinking, not “wait”

All LED’s blinking

Retract All, then Configure Level Point

Configure Air Dump, or wait 30 sec. for no Air Dump

System Requires a minimum of 12.5 Volts to operate

Motor overheat – Wait ½ hour and try again

Check connections, change 8-pin wire

Check connection, change control module

Contact RV service, System requires signal

Brake set, Check Park Brake signal at control module (12 Volts, see pg. 12)

Check Park Brake signal at coach connection (12 Volts, see pg. 12)

Continued next page
Leveleg Trouble Shooting

Some LED’s light with no operation of keypad, Continued

(5) Vertical LED’s blinking

No “Park/Neutral” LED, but others lit

Press RET+ALL to clear mode

NO

YES

Check connection, change control module

Check connection, change keypad

NO

YES

Workhorse board, 66274

Ford board, 66275

Check connections, change 8-pin wire

Contact RV service, System requires signal

NO

YES

Check Trans. signal at coach connection, see pg. 12 (12 Volts-Workhorse / Ground-Ford)

Check Trans. signal at control module, see pg. 12 (12 Volts-Workhorse / Ground-Ford)

Check Trans. Signals in/out of gear to determine correct control module

NO

YES

12V- Park/Neutral
Gnd- In gear

Gnd- Park/Neutral
12V- In gear

Check 4-pin signals at control module, see pg. 12 (3 leads 12V, 1 ground)

Check 4-pin signals at keypad, see pg. 12 (3 leads 12V, 1 ground)

Check connections, change 4-Pin conn. Lead

Check connections, change control module

Check connections, change control module

Contact RV service, System requires signal
Leveleg Trouble Shooting

**Jack Continues to Clutch and will not Turn Off**

**NO ALARM**
- Send into error mode, disconnect a Leveleg, press RET+ALL
- See page 23 to clear error

**W/ ALARM**
- Press ON to shut warning alarm off
- Press FRONT+DRIVER+REAR+PASS+ALL to reset internal timers
- Complete a RET+All to return to normal operation

**UNIT CONTINUES TO CLUTCH**
- Press any button to stop clutching

---

Atwood Mobile Products
Leveleg Trouble Shooting

Red and Green Lights come on for a Leveler Location (Error Mode)

W/ ALARM

Press ON to shut warning alarm off

Extend each leg 3-4 seconds if close to retraction. Press EXT+(Leg position buttons)

ALL LEVELEGS EXTEND/RETRACT

Press FRONT+DRIVER+REAR+PASS+ALL to reset internal timers

Replace Leveleg, Part number label on lower front of leveler

Check voltage at motor connection during Ext./Ret. (12volts)

NO

YES

Replace Harness wiring to problem leveler

Hold RET+ALL until retract begins (2-3 seconds) to return to normal operation

Check voltage at Control Board connection during Ext./Ret. (12volts)

NO

YES

Replace Control Board

Replace Harness wiring to problem leveler

Hold RET+ALL until retract begins (2-3 seconds) to return to normal operation

Replace Control Board
**Auto Level does not level coach**

**NO SYSTEM REACTION**

Check the mounting of the control board to be solid and reasonably horizontal (<10 degrees)

**DID NOT LEVEL**

Send into error mode, disconnect a Leveleg, press RET+ALL

**MANUALLY LEVEL COACH**

Extend each leg to ground and manually level coach. Press EXT+(Leg position buttons until level)

**RESET LEVEL INTO MEMORY**

Press ON (turn keypad off), Press EXT (5) times, Press RET (5) times, (all lights will blink), Press ALL (3) times, (all lights will stop blinking)

Press RET+ALL to send system to home position

Press AUTO to level

Replacement Parts List

Single Pack Levelers
- 66331 Single Screw, Sq Tube, 15"  7,500  15" Travel. Boxed 66280.
- 66335 Single Screw, Sq Tube, 13"  7,500  13" Travel. Boxed 66302
- 66324 Ford Relay Control Service Kit (includes control module and IOM)
- 66330 Workhorse Relay Control Service Kit (includes control module and IOM)
- 66323 Keypad Service Kit Rev. 4 and before (includes keypad/IOM; for either Ford or Workhorse)
- 66342 Keypad Service Kit Rev. 5 and after (includes keypad/IOM; for either Ford or Workhorse)

Accessories
- 66017 Wiring Harness for 5th wheels
- 66021 Control Board Bracket Kit
- 66023 Wiring Harness for motorhomes
- 66024 Cross Brace Kit
- 66026 8 pin Signal Wire
- 66027 4 pin Control Pad Wire
- 66341 Wiring Harness for Diesel Air Dump/Fill
- 71600 Cross brace - 5th Wheel, outboard
- 71610 Cross brace - 5th Wheel, inboard
Does customer need control board, keypad, or both?

Does the keypad have a revision # sticker on the back?

- No

Does the keypad have two LED's (lights) between the EXT and RET buttons?

- Yes

- No

Is it a Workhorse chassis or a Ford chassis? Or do they have the part # off the control board?

- Workhorse/66274
  - REV. 4
    - Workhorse/66274
      - #66330
    - REV. 5 or higher
      - No
        - #66324
      - Yes
        - #66323
  - FORD/66275
    - #66342

- FORD/66275
  - #66342
  - #66324

SERVICE KIT

- #66276
- #66272
- #66304
- #66324
Return Goods Policy and Warranty

Atwood warrants that our products will be free of defects of material or workmanship for a period of two years from the original date of purchase. Our liability is limited to the replacement of the product, repair of the product, or replacement with a reconditioned product at our discretion.

In the event of a warranty claim, you must contact, in advance, either an authorized Atwood Service Center, or the Atwood Service Department at 564-262-2655.

Return parts must be shipped prepaid to Atwood Mobile Products, 800 Hwy 150 S, West Union, IA 52175. The Return Goods Number (RGN) must be clearly marked on the paperwork and on the carton. No returns will be accepted without an RGN.

The returned parts become the property of Atwood. We will inspect the parts and determine causality. If it is a defect in material or workmanship, Atwood will replace the product at no charge, pay all reasonable labor charges in accordance with our Hardware Flat Rate Schedule, and freight. Damage or failure resulting from misuse (including failure to seek proper repair service), misapplication or alterations are the owner’s responsibility.

Questions
This manual has been provided courtesy of
My RV Works, Inc.
www.myrvworks.com

You can find more RV service manuals here:
www.myrvworks.com/manuals

Over the years of running a mobile RV repair service, having a dedicated place to access service manuals for all the different appliances and components found on RVs was something that I always had a desire to create.

I hope this resource makes your RV repairs easier, as it has mine, but please be careful and follow proper safety practices when attempting to repair your own RV.

If in doubt, please consult with a professional RV technician!

DARREN KOEPP - OWNER, MY RV WORKS, INC.
